The screw tops turn made of the basic material - Hostalen ACP 5531 B (HDPE) manufactured with supplement of Masterbatches.

- a) No substances are contained with SML values: See enclosed raw material certificate.
- b) These are substances available with SML values:

3 Confirmation:

The materials listed under item 2. in her composition and their processing by LT-Kunststofftechnik GmbH & Co. KG are in the harmony with the following guidelines:

It no. 1935/2004 (or correspondences in the European are for the production of the above-mentioned articles exclusively exit polymer and additives used, this one in the positive lists of the ordinance (EU) no. 10/2011, the frame ordinance for need objects (EC)) listed synthetic material is & correspond guidelines. So no exit polymer or additives for which food legal use restrictions are known to us or ours for suppliers are used.

The above details are based on information on the part of our pre-suppliers and correspond to our state of knowledge of today. LT Kunststofftechnik GmbH & Co. KG does not carry out any migration checks.

A check of the details by corresponding tests does not take place in our house. Migration and rest salary values as well as the influence on the organoleptischen features of the filling good have to be checked by the cbm bottler in the need.

We would in conclusion like to point that filling good always lies the responsibility with the bottler or with the producer of the filling good for the suitability of the complete packing for it.

The details from this explanation do not release him from the execution of corresponding checks. Legal regulations have to be taken into account by the receiver in responsibility of his own.

4 Date of the explanation: 14.11.2014

Hoffmann, Frank
Managing director
